

Domestic heating guide

Dimplex has a heating solution for every room in the house. Whether it's a whole house heating system or a single room, one of the real benefits is that you can choose from a whole range to meet your exact requirements.

This guide gives you a room by room selection, but your

final choice will depend on your personal preferences and other factors*. Please also see pages 10-12 for design information. If you need further help or guidance, speak to your electrical retailer/contractor or phone our customer helpline on 0845 600 5111.

*Factors affecting final choice will include heating level, size of room, position of heater in room etc.

BATHROOM	
Panel heaters	pgs 16-29
Mini storage heaters	pgs 38-39
