

Commercial heating guide

Dimplex heaters are ideal for use in many commercial and industrial applications as outlined here.

This table should be taken as a guide only. Individual requirements will depend on a number of factors including size of building, insulation levels, and heating level recommended.

For more accurate guidance, please contact our customer care department. Don't forget heat pumps are also ideal for a wide range of commercial installations, from offices through to schools*.

*Grants of up to 50% are available on Dimplex ground source heat pump installations for not-for-profit organisations. Please visit www.dimplex.co.uk for more details.

Location	Product Range	Page	Comments
Small Business			
– Workshops	Commercial fan heaters	92-97	Directional fan heating
– Workstations	Quartzray & ceramic radiant heaters	100-103	Efficient zone heating
– Temporary Buildings	Portable convector heaters	66	Compact heaters
